

To whom it may concern, I heavily rely on the instant traffic and weather provided by XM. In fact it may be the channel of their system I use most. Houston traffic is a nightmare and the local radio stations are a complete joke at giving accurate and timely information. The local broadcast channels are far more interested in their other program content than they are traffic that you are lucky to even get info about the area you drive. I am so frustrated by most mainstream broadcasting, programming, advertising, and general approach to the public that I chose to pay a subscription fee to get away from them. Please don't take away our right to choose to avoid broadcast garbage.
